

# Reviewers Get Your ARC Now!

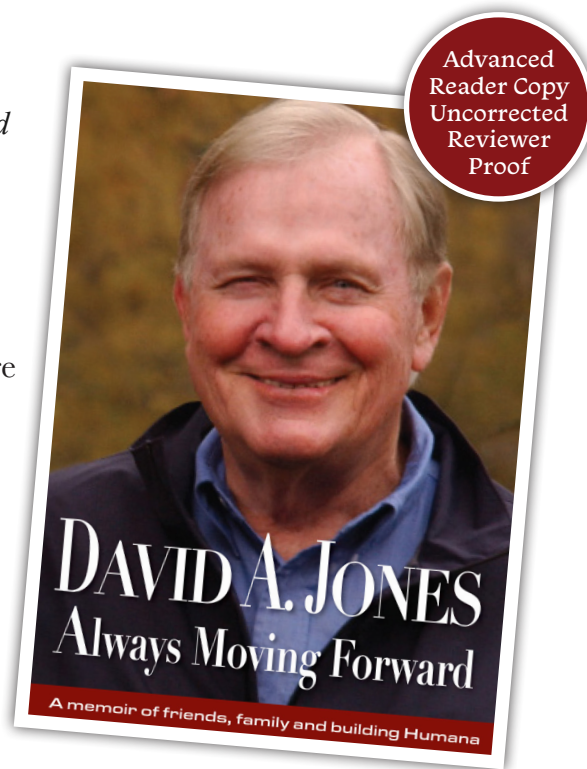

*“As a creature of American fiction, the successful business executive is often not a pleasant person. Sacrificing friends, family, love, and principles in his lust for success, he is depicted as outwardly brutal, inwardly empty, having killed off even his capacity for joy. Rich, powerful, alone at the top.*

*On the other hand, there is David Jones.”*  
— **Courier Journal columnist John Ed Pearce**

An inspiring and insightful autobiography of the healthcare business innovator and philanthropist who founded the multi-billion dollar Humana corporation. The story of friends, family, hometown values – and an entrepreneur who changed American healthcare.

“David Jones was the single most influential friend and mentor I’ve had in my entire career. I’ve never forgotten what he told me when I was starting out: The most important word in the English language is ‘focus.’”  
— **U.S. Senator Mitch McConnell**

“David cared about one thing more than any other: helping people. He brought many new ideas to health care, and Humana and the people we serve benefited every time.”  
— **Bruce Broussard, president and CEO, Humana**
